

# APOLLO PRO II

## COMMERCIAL FLUID ROWER

**FDF** A timeless gym favourite wrapped in wood grain.

The Apollo Pro II is a commercial grade, natural wood rowing machine, perfect for group training or high-end home gyms. The meditative motion and integrity of construction sets the Apollo Pro II apart from its competitors. Handcrafted from the finest quality American Ash wrapped around a stabilising steel frame, this steadfast water rower offers a standout performance even in the harshest of fitness applications.

A dependable best seller, this rower is guaranteed to keep members returning. In addition, its small foot print, handy transport wheels and self-cleaning wheel mechanism, make it a low-maintenance and excellent value investment.

**FDF** Fluid innovation to inspire greater motivation.

The Apollo Pro II is suitable for all levels of fitness, providing a total body challenge that incorporates the upper body, lower body and core simultaneously. Unlike other water rowers, this indoor rower's variable resistance levels will impress, enabling you to change resistance at the turn of a dial for continuous progression as you build muscle and strength.

If you are accustomed to the natural catch and feel of on-water rowing, your rowing technique will immediately appreciate the Apollo's unrivalled emulation of a boat gliding through water. FDF's patented twin tank design generates a smooth uniform stroke, including no lag of resistance at the catch and continued resistance all the way to the finish.
